### About AirCheck

AirCheck is a world leader in radio spot and music monitoring, providing services for broadcasters, media research firms, the recording industry and advertising agencies. AirCheck India, a subsidiary of US-based RCS Inc., provides audio identification services of commercials and songs that are played on air. AirCheck India monitors radio stations around the clock, every day of the year and provides "same day" verification. The data is made available to the subscribers in near real time on the web via [www.aircheckindia.com](http://www.aircheckindia.com). In addition, in the United States AirCheck - known there as Media Monitors - provides services such as Newspaper Ad Tracking, TV Spot Monitoring, Spot Ten® weekly charts of radio advertisers, and also conducts custom research projects.

AirCheck came into existence because for decades, it was expensive and tedious for radio advertisers to verify the number of times a spot played or whether the right copy ran on-air. With the patented technology of AirCheck, Sales Executives can have details on a particular radio spot or an entire media campaign at their fingertips in seconds. The broadcast content recognition process used by AirCheck is protected by U.S. Patent 7,386,047 with additional patents pending.

### About RCS

RCS is the world's leading provider of broadcast and Webcast software, serving over 9,000 radio stations, TV music channels, cable companies, satellite music networks and Internet stations worldwide. RCS serves clients in 100 countries from its 23 offices around the world, providing round-the-clock 24/7 global support. In India, RCS serves broadcasters, among them many of the recently licensed FM radio stations, through its subsidiary Radio Computing Services (India) Pvt. Ltd., founded in 2002.
